Experienced front-end developer with over 5 years in web development, specializing in React.js, Next.js, and user-centric design. Starting in graphic and web design, I bring a creative eye to responsive, high-performance web applications, blending technical skill in JavaScript (ES6+), HTML, CSS, and state management tools like Redux and Context API. Skilled in integrating RESTful APIs, server-side rendering, and static site generation, I build complete, scalable solutions with seamless front-end and backend functionality using Node.js. Committed to clean, testable code, cross-browser compatibility, and continuous learning, I thrive in collaborative, agile environments and prioritize delivering user-friendly, visually appealing applications.

SKILLS

Python, DSA, HTML, CSS, JavaScript, React JS, Redux, Next.js, Node JS, MongoDB, MySQL, Bootstrap, Tailwind CSS, Figma, Adobe XD, RESTful APIs, Responsive Design, Cross-Browser Compatibility, Git, GitHub, Bitbucket, CI/CD, Webpack, Babel, NPM, Yarn, Agile Methodologies, UI Design, UX Design, Accessibility (WCAG), Performance Optimization, AWS, Azure, and Nginx.

WORK EXPERIENCE

Techsaga Corporations

Front-end Developer

Dec 2022 - Present

- Currently employed as a Front-end Developer at Tech Saga Corporation, contributing to a wide range of projects, including CRM, ERP, online learning platforms, e-commerce applications, and more.
- Developed and maintained responsive, scalable web applications using the MERN stack, ensuring high performance and user-centric designs.
- Collaborated with cross-functional teams to translate client requirements into practical features, improving user experience and operational workflows.
- Implemented real-time data handling, enabling dynamic updates for inventories, customer information, and transaction data.
- Led UI/UX design initiatives for each project, focusing on intuitive interfaces and seamless navigation to enhance user engagement.
- Created and executed test plans, cases, and scenarios to ensure application functionality, performance, and reliability across different platforms.
- Optimized web applications for SEO by implementing meta tags, structured data, and server-side rendering using Next.js, improving search engine visibility and ranking.

Invest Mango Pvt. Ltd.

Front-end Developer

Aug 2021 - Dec 2022

- Worked as a Front-end Developer at Invest Mango, a property-focused company.
- Developed and maintained a web application for an online flat booking system using the MERN stack (MongoDB, Express.js, React, Node.js).
- Designed the user interface to allow users to select specific flats based on their preferences, needs, and budget.
- Collaborated with builders to implement features for real-time inventory updates, pricing adjustments, and project information management.
- Created test plans, scenarios, and cases for web application features to ensure functionality and performance.
- Led frontend UI/UX design efforts, focusing on seamless navigation and a user-friendly experience to enhance customer engagement.
- Assisted with deployment and code version control to maintain a stable, efficient application for users and builders alike.

Web Designer

- Designed and developed responsive websites, ensuring seamless performance across various devices and browsers.
 - Utilized HTML, CSS, and JavaScript to build and customize web pages, integrating multimedia elements and interactive features.
 - Maintained and updated existing websites, troubleshooting issues and optimizing performance for better user experience and accessibility.
-
